

Consistent quality, dependable delivery and proven results.

Dakota Gold Distillers Wet Grains (DWG) feature uniform particle size, high palatability and nutrient value proven to maximize feed utilization and performance.

Without the need for drying time, this valuable feed source is often times more affordable than traditional distillers grains — and therefore an excellent solution for ruminant operations within truck delivery areas.

- Recommended for ruminants
- Approximately 65% moisture
- Safe, economic source of key nutrients

Distillers Wet Grains

# Dakota Gold®

## Distillers Wet Grains

### DRY MATTER

#### Protein, Fat, Energy, Fiber

Item	Value <sup>1,2</sup>
Dry Matter, %.....	32.50
Crude Protein, % .....	32.34
Crude Fat, %.....	5.99
Crude Fiber, %.....	8.96
ADF, %.....	12.43
NDF, %.....	35.08
Ash, %.....	2.71
NE <sub>L</sub> , Mcal/cwt <sup>3</sup> .....	103
NE <sub>M</sub> , Mcal/cwt <sup>3</sup> .....	100
NE <sub>G</sub> , Mcal/cwt <sup>2</sup> .....	68

#### Minerals

Item	Value <sup>1,2</sup>
Calcium, %.....	0.03
Phosphorus, %.....	0.57
Sodium, % .....	0.06
Potassium, % .....	0.55
Magnesium, %.....	0.16
Sulfur, %.....	0.62
Copper, ppm .....	5.33
Iron, ppm .....	59.84
Manganese, ppm .....	8.79
Zinc, ppm .....	60.10

1 All Values: Dry Matter Basis

2 Average of New Crop '10-'11 samples sent to Midwest Laboratories, Omaha, Nebraska.

3 All energy values determined experimentally assume following values for corn: NE<sub>L</sub> = 91; NE<sub>M</sub> = 98; NE<sub>G</sub> = 65.
